Other Skills:	UI/UX Design, Multimedia Production, Problem Solving

PROJECTS

SplitSync – Shared Expense Management Web App

2025 – Present

Final Year Project

- Designed and developed a mobile-first Progressive Web App for managing shared expenses among groups with React, Firebase, and modern frontend architecture with focus on scalability, usability, security and real-time updates.
- Implemented core features including real-time expense tracking, balance calculation, smart settlement suggestions, transparent ledger system, notifications and OCR receipt scanning.

GuestEase – Hotel Guest Assistant Web App

2025

Year 3 Project

- Developed a digital concierge platform to enhance hotel guest experience through service automation.
- Designed features such as room service requests, bookings, recommendations, and real-time communication; designed for PWA deployment.

Equipment Hire Web App

2024 / 2023

Team Projects

- Developed responsive frontend using HTML and CSS and Full-stack PHP/MySQL CRUD system for equipment rentals.
- Implemented Equipment items, Staff and management pages

Student Management System

2024 / 2023

Team Projects

- Developed Java & SQL desktop app for student record management, designed class diagrams and implemented a GUI-based interface.

Health Insurance Calculator

2022

Team Project

- Built a calculator application with GUI for policy evaluation.
- Implemented business logic and performed testing for accuracy.

EDUCATION

BSc (Hons) in Software Development (Awaiting result) –

South East Technological University, Carlow

Sep 2022 – May 2026

QQI Level 5 Computer Science in Software Development (Distinction) –

Portlaoise Institute

Sep 2021 – May 2022

EXPERIENCE

Multimedia Specialist (Voluntary) –

RCCG All Saints Trinity Hall, Portlaoise

Aug 2022 – Present
